PROFESSIONAL SUMMARY

Web Developer with 2+ years of freelance experience building, deploying, and maintaining websites, landing pages, e-commerce projects, and web integrations. I currently work on projects through Okacodes, with hands-on experience using React, Next.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma, payment integrations, VPS hosting, Coolify, and Docker.

I'm looking for my first role in a more structured tech environment where I can contribute my hands-on experience from real projects while continuing to grow in software development practices, teamwork, QA, code review, deployment, and production maintenance.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Responsive Web Development.

Backend: Node.js/Express fundamentals, REST APIs, PostgreSQL, Prisma ORM.

Integrations: Stripe, Mercado Pago, WooCommerce, Google Analytics, Meta Pixel, Google Tag Manager.

Infrastructure & Deployment: Linux VPS, Hostinger, Coolify, SSH, DNS, SSL, firewall fundamentals, Docker.

Tools: Git, GitHub.

PROFESSIONAL EXPERIENCE

Freelance Web Developer — Independent Projects / Okacodes

Jun 2023 – Present

- Built and maintained websites, landing pages, and e-commerce projects for small businesses and independent clients.
- Built responsive interfaces using React, Next.js, TypeScript, and Tailwind CSS.
- Worked with payment integrations, headless architecture, VPS/Coolify deployments, domains, SSL, analytics, and tracking tools.
- Communicated directly with clients to gather requirements, align project scope, explain technical decisions, and provide post-launch support.

SELECTED PROJECTS

FXSoftwares — Headless E-commerce for Digital Products

- Built the frontend of an e-commerce site for digital software products with Next.js, React, TypeScript, and Tailwind CSS, including product pages, search, filters, cart, checkout, and order history.
- Integrated WooCommerce, Mercado Pago, NextAuth, and Resend to handle products, customers, orders, and payments, and to automatically send delivery links by email after payment approval.
- Set up deployment on a VPS with Coolify and implemented payment webhooks, Meta Pixel/CAPI tracking, and post-launch maintenance.

Viralizaai — Checkout Platform for Digital Services

- Built a checkout platform to automate a previously manual sales process for digital services, with package selection, order configuration, and PIX payments.
- Integrated Mercado Pago for PIX payments, including QR code generation, copy-and-paste payment codes, payment status tracking, and automatic webhook confirmation.
- Built an admin dashboard with NextAuth, Prisma, and PostgreSQL to manage service availability, pricing tiers, and preset options.

Marques&Leão — Real Estate Website with Property Listings and Map

- Built the frontend of a real estate website with Next.js, React, TypeScript, and Tailwind CSS, including property listings, agent profiles, and property submission pages.
- Built responsive components, carousels, property cards, and a Google Maps API integration to display property locations on an interactive map.

EDUCATION & LANGUAGES

Systems Analysis and Development — Centro Universitário SENAC - Santo Amaro | Expected start: Oct 2026

Portuguese: Native | English: Intermediate/Advanced.
